

Name: Benjamin Dickinson

Assignment: MathTutorV1

Review 1: Kayleena Parnell

Kayleena was nice to work with because she had little to no coding experience. It was cool being something like a teacher/tutor since I have much more experience. This did come at the obvious expense of her needing help, but we all start off somewhere. She was also very open to us having to take in our third group member (Brayden), which was nice.

Review 2: Brayden Tolle

Brayden came in with a decent amount of coding experience, allowing us to go above and beyond the project requirements, which is awesome. My only complaint was that he was in another section of the class, so the three of us could never work together as a group. I would love to work with Brayden again!
